# Math Language That Works

A Supplement to *CAHSEE Prep* and *Getting Ready for Algebra*

## ORDER FORM

The development of **Math Language That Works** was commissioned by the San Diego County Superintendents' Achievement Gap Task Force to assist teachers in providing math vocabulary instruction so that students can better understand the mathematical concepts necessary to master the content standards. It is designed as a supplement for use with *CAHSEE Prep* and *Getting Ready for Algebra* - intervention materials for students who are struggling with standards tested in the CAHSEE and at-risk of not passing Algebra.

**Math Language That Works** provides:

- Background information for math teachers on the benefits of effective vocabulary instruction
- Matrices that identify the math content vocabulary found in the standards addressed in *CAHSEE Prep* and *Getting Ready for Algebra*
- Research-based strategies for explicit vocabulary instruction
- Lesson templates for lesson planning
- A glossary with concise explanations of math terms and academic language
- Activities for review and practice to reinforce students' understanding of previously taught terms and concepts
